
Country Rankings: 1999

As a statistical aid, the following tables show 167 countries of the world listed in descending order of their 1999 value for each of 7 absolute and 10 relative (or ratio) indicators. These data are taken from Main Statistical Tables I and II, below.

Users of the rankings should be aware that they are based on data that are in many cases qualified, as indicated by annotations in Tables I and II such as “not available,” “rough estimate,” “estimate,” and others. These tables should be consulted in interpreting the rankings.

Entries marked “not available” (NA) are ranked on the basis of very rough estimates. While it is considered preferable to include countries with such data in the rankings rather than omit them, these ranks should be understood as having a wide range of error, which in most cases extends well beyond the level of neighboring countries in the rankings.

The indicators, their abbreviations, and their data units are as follows:

Military expenditures (ME).....	Millions of dollars
Armed forces (AF).....	Thousands
Arms exports (AE).....	Millions of dollars
Arms imports (AI).....	Millions of dollars
Gross national product (GNP).....	Millions of dollars
Central government expenditures (CGE).....	Millions of dollars
Population (POP).....	Millions
ME/GNP.....	Percent
ME/CGE.....	Percent
ME per capita (ME/POP).....	Dollars
ME per soldier (ME/AF).....	Dollars
Armed forces per 1,000 people (AF/POP).....	Soldiers
Arms exports / total exports (AE/TE).....	Percent
Arms imports / total imports (AI/TI).....	Percent
GNP per capita (GNP/POP).....	Dollars
CGE per capita (CGE/POP).....	Dollars
CGE/GNP.....	Percent

A summary “index”, which lists the countries of the world alphabetically and shows each country’s rank number for each indicator, may be found on the final pages of this set of tables. (The symbol “+” here indicates that the country’s value for that indicator is zero and the rank is actually a tie for last place).

All monetary values are in 1999 dollars. For most countries, national currencies were converted at average annual 1999 exchange rates, while for some, a purchasing power parity (PPP) was used (as indicated in Table I). Users should be aware that country rankings can shift considerably from edition to edition due to the change in the base year for exchange rates and depending on whether exchange rates or PPP’s were used .

Country Rank in 1999 by Indicator

Military Expenditures (ME) (millions of dollars)				Armed Forces (AF) (thousands)
