June 14, 2002

The Honorable Robert S. Mueller, III  
Director  
Federal Bureau of Investigation  
U.S. Department of Justice  
935 Pennsylvania Avenue, Room 7240  
Washington, DC 20535-0001

Dear Director Mueller:

I am writing to request a copy of the document described as "the E.C." that is referenced in the attached FBI memo which was recently made public. The last paragraph of the memo refers to "FISA mistakes covered in the E.C. I have prepared to go to the field, and which is in NSLU for signature."

Given the sensitivity and importance of FBI activities undertaken pursuant to the Foreign Intelligence Surveillance Act, I believe it is critical that the Judiciary Committee be aware of any past or ongoing "mistakes" the Bureau has identified in this area.

I look forward to your expeditious response to this request.

Sincerely,

William D. Delahunt

Enclosure

Subject: [Redacted]

I just received a call from [Redacted] at OIPR. To state that she is unhappy with ITOS and the UBL Unit would be an understatement of incredible proportions. I will try to relate what I think has happened with the above named FISA.

[Redacted] secured an ELISUR FISA very quickly on the request of [Redacted] states that she was assured that the FBI had special software which could do what the FBI said it could do. In fact, [Redacted] states that the technical people in Quantum approved the FISA language.

The FBI technical people went to install the FBI software to accomplish the electronic surveillance on March 15.

The software was turned on and did not work correctly. The FBI software not only picked up the E-Mails under the electronic surveillance of the FBI’s target but also picked up E-Mails on non-covered targets. The FBI technical person was apparently so upset that he destroyed the E-Mail take, including the tape on which it was recorded. Under the impression that no one from the FBI was present to supervise the FBI technical person at the time. Now the FBI technical people want to run a new software experiment of the carrier to see if it works.

[Redacted] states that OIPR was never told that the FBI software was experimental. OIPR was informed that it would work. The FBI technical people are still trying to make it work on [Redacted] and want to resume the electronic surveillance. The FBI people in general also want a physical search warrant to pick up the E-Mails from the carrier, which the FBI picked up on the target, but destroyed.

[Redacted] informed me that the FBI has not had the authority to resume the electronic surveillance until they receive a written explanation of what has happened and they feel something with the court. Obviously, she has no intention of securing a search warrant either until this is straightened out.

When you tell this story to the FISA mistakes committee in the CIC, I have prepared to go to the field, and which is in NELU for signature before it goes to [Redacted] for his signature, you have a pattern of occurrences which indicate to OIPR an inability on the part of the FBI to manage its FISAs.

[Redacted]

Thanks.
