Global Command and Control System-Army (GCCS-A)

**MISSION**
Provides critical automated command and control (C2) tools for combatant commanders to enhance Warfighter capabilities throughout the spectrum of conflict during Joint and combined operations.

**DESCRIPTION**
Global Command and Control System-Army (GCCS-A) is the Army’s strategic, theater, and tactical command, control, communications (C3) system. It provides a seamless link of operational information and critical data from the strategic Global Command and Control System-Joint (GCCS-J) to Army theater elements and below. GCCS-A assists in mission planning, deployment support, operations in theater, and redeployment. It provides a common picture of Army tactical operations to the Joint and coalition communities and delivers joint asset visibility to the Army to facilitate operations. GCCS-A is the commander’s battle command asset for force planning and projection (provided by Defense Readiness Reporting System-Army (DRRS-A)), readiness, and situational awareness, and it is the system of record for theater Army headquarters worldwide.
