

Joint Biological Standoff Detection System (JBSDS)

INVESTMENT COMPONENT

Modernization

Recapitalization

Maintenance

MISSION

Provides advanced, early-warning (Detect to Warn), standoff detection of biological warfare agents (BWA) on a stationary platform or fixed site, used in conjunction with other biological point detectors for advanced warning, reporting, and protection.

DESCRIPTION

The Joint Biological Standoff Detection System (JBSDS) will be the first biological defense Detect to Warn capability to protect individual Warfighters.

The JBSDS Increment 1 provides initial early warning capability against biological warfare agent attack by detecting aerosol clouds out to five kilometers with infrared (IR) light detection and ranging (LIDAR). JBSDS Increment 1 operates at fixed sites or in a stationary mode on mobile platforms. JBSDS Increment 1 system will be used for training to support Increment 2 concept of operations development.

JBSDS Increment 2 will provide 24/7 near-real-time biological warfare agent (BWA) detection and will network with existing biological detection systems

to provide early warning (Detect to Warn) theater-wide to limit the effects of biological agent hazards against U.S. forces at the tactical and operational levels of war. JBSDS Increment 2 can be employed in support of various areas (e.g., fixed sites, air ports of debarkation/sea ports of debarkation, forward operating bases, amphibious landing sites), on platforms, or stationary vehicles. JBSDS Increment 2 will pass detection information and warnings through existing and planned communications networks (e.g., Joint Warning and Reporting Network). Commanders may integrate JBSDS Increment 2 outputs with information from intelligence, meteorological, radar, medical surveillance, local area operations, and other available assets to increase force protection, mitigate the consequences of biological hazards, and maximize combat effectiveness.

SYSTEM INTERDEPENDENCIES

In this Publication

Joint Warning and Reporting Network (JWARN)

Other Major Interdependencies

Combat Service Support Automated Information Systems Interface (CAISI)-Inc 1, JWARN-Inc 2

PROGRAM STATUS

- **2QFY11:** JBSDS Increment 2 Milestone A decision

PROJECTED ACTIVITIES

- **1QFY12-3QFY13:** Prototypes testing
- **3QFY14:** Preliminary design review
