MISSION
Provides combatant commanders a real-time responsive capability to conduct long-dwell, persistent stare, wide-area reconnaissance, surveillance, target acquisition, communications relay, and attack missions.

DESCRIPTION
The MQ-1C Gray Eagle Unmanned Aircraft System (UAS) addresses the need for a long-endurance, armed (up to four HELLFIRE missiles), unmanned aircraft system that offers greater range, altitude, and payload flexibility.

The Gray Eagle UAS is powered by a heavy fuel engine (HFE) for higher performance, better fuel efficiency, common fuel on the battlefield, and a longer lifetime.

Its specifications include the following:
- **Length:** 28 feet
- **Wingspan:** 56 feet
- **Gross take-off weight:** 3,600 pounds
- **Maximum speed:** 150 knots
- **Ceiling:** 25,000 feet
- **Range:** 2,500 nautical miles via satellite communications (SATCOM)
- **Endurance:** 27+ hours

The Gray Eagle UAS is fielded in company sets, consisting of 12 unmanned aircraft, six One System Ground Control Stations (OGCS), six Ground Data Terminals (GDT), three Portable Ground Control Stations (PGCS), three Portable Ground Data Terminals (PGDT), three Satellite Ground Data Terminals (SGDT), an Automated Take-off and Landing System (ATLS), Light Medium Tactical Vehicles (LMTV), and other ground-support equipment, operated and maintained by a company of 128 Soldiers within the Combat Aviation Brigade.

SYSTEM INTERDEPENDENCIES
Other Major Interdependencies
PM Robotic Unmanned Sensors (PM RUS) provides the electro-optical/infrared (EO/IR) and SAR/GMTI payloads, PM Joint Attack Munition Systems (PM JAMS) provides HELLFIRE missiles, PM Warfighter Information Network-Terrestrial (PM WIN-T) provides communications relay payload.

PROGRAM STATUS
- **Current:** Low-Rate Initial Production

PROJECTED ACTIVITIES
- **4QFY12:** Initial Operational Test and Evaluation
- **2QFY13:** Full-Rate Production Decision
