#### MISSION

Facilitates movement, management, and control of personnel, equipment, and supplies from a home station to a theater of operations and back, and provides in-theater support for onward movement, sustainment planning requirements, and source in-transit visibility data.

#### DESCRIPTION

The Transportation Coordinators’ Automated Information for Movement System II (TC-AIMS II) is a service migration system. Characteristics include: source feeder system to Joint Force Requirements Generation II, Joint Planning and Execution System, Global Transportation Network, and Services’ command and control systems; common user interface to facilitate multiservice user training and operations; commercial off-the-shelf hardware/software architecture; net-centric implementation with breakaway client-server and/or stand alone/workgroup configurations; and incremental, block upgrade developmental strategy.

#### PROGRAM STATUS

- **1QFY11**: Completed TOPS implementation in Iraq and Kuwait
- **2QFY11**: Released TC-AIMS II v6.1.1
- **2QFY11**: JUONS approved to provide in-transit visibility and automate capability to manage surface and air transportation services
- **4QFY11**: Will reach FOC

#### PROJECTED ACTIVITIES

- **4QFY12**: Complete TC-AIMS II version 7 (Wilton); provide Vista/Windows 7 compatibility, data checks/validations; publish CMP to SIPRNET
- **4QFY12**: Complete AMR Phase II fielding
- **3QFY13**: Complete TC-AIMS II version 8; integrate with SLPC, migrate reference data

#### SYSTEM INTERDEPENDENCIES

None
Transportation Coordinators’ Automated Information for Movement System II (TC-AIMS II)

FOREIGN MILITARY SALES
None

CONTRACTORS
Systems Integration:
Engineering Research and Development Command (Vicksburg, MS)
Future Research Corp. (Huntsville, AL)
Apptricity Corp. (Dallas, TX)

Program and Fielding/Training support:
L-3 Services, an MPRI Company (Alexandria, VA)
