Medical Communications for Combat Casualty Care (MC4)

MISSION
Integrates, fields, and supports a comprehensive medical information system, enabling lifelong electronic medical records, streamlined medical logistics and enhanced situational awareness for Army operational forces.

DESCRIPTION
Medical Communications for Combat Casualty Care (MC4) is a ruggedized system-of-systems containing medical software packages fielded to operational medical forces worldwide, providing the tools to digitally record and transfer critical medical data from the foxhole to medical treatment facilities worldwide. MC4 helps ensure service members have secure, accessible, lifelong electronic medical records, resulting in better informed health care providers and easier access to Veteran's Affairs medical benefits.

SYSTEM INTERDEPENDENCIES
In this Publication
None

Other Major Interdependencies
MC4 relies on software developers such as the Defense Health Information Management System to provide global software databases to store data generated by the MC4 system, providing medical situational awareness for operational commanders and patient record visibility to medical staffs worldwide.
