Black Hawk/UH/HH-60

MISSION
Provides air assault, general support, aeromedical evacuation, command and control, and special operations support to combat, stability, and support operations.

DESCRIPTION
The Black Hawk (UH-60) is the Army’s utility tactical transport helicopter. The versatile Black Hawk has enhanced the overall mobility of the Army due to dramatic improvements in troop capacity and cargo lift capability. It will serve as the Army’s utility helicopter in the Future Force.

There are multiple versions of the UH-60 Black Hawk: the original UH-60A; the UH-60L, which has greater gross weight capability, higher cruise speed, rate of climb, and external load; and the UH-60M, which includes the improved GE-701D engine and provides greater cruising speed, rate of climb, and internal load than the UH-60A and L versions. During FY10 the Army decided to continue only with developmental testing of the UH-60M P31 Upgrade components, including Common Avionics Architecture System, fly-by-wire flight controls, and full authority digital engine control upgrade to the GE-701D Engine.

There are also dedicated Medical Evacuation (MEDEVAC) versions of the UH-60 Black Hawk: the HH-60A, HH-60L, and HH-60M each include an integrated MEDEVAC Mission Equipment Package (MEP) kit, providing day/night and adverse weather emergency evacuation of casualties.

On the asymmetric battlefield, the Black Hawk enables the commander to get to the fight quicker and to mass effects throughout the battlespace across the full spectrum of conflict. A single Black Hawk can transport an entire 11-person, fully equipped infantry squad faster than predecessor systems and in most weather conditions. The aircraft’s critical components and systems are armored or redundant, and its airframe is designed to crush progressively on impact, thus protecting crew and passengers. The UH-60M is a digital networked platform with greater range and lift to support maneuver Commanders through air assault, general support command and control, and aeromedical evacuation. Full-rate production for the new-build UH-60M began in 2007 and the UH-60M and HH-60M MEDEVAC aircraft continue to be deployed in combat rotations.

SYSTEM INTERDEPENDENCIES
In this Publication

Other Major Interdependencies
Blue Force Tracker (BFT)

PROGRAM STATUS
• Current: Production and fielding of UH-60M and HH-60M aircraft
• FY12: Multi-Year/Multi-Service VIII contract award
• FY12: Materiel Development Decision (MDD) for Improved Turbine Engine Program (ITEP)

PROJECTED ACTIVITIES
• Continue: Production and fielding of UH-60M and HH-60M aircraft
• FY13: Milestone A for ITEP
Black Hawk/UH/HH-60

**MAX GROSS WEIGHT** (pounds):
- UH-60A: 20,250
- UH-60L: 22,000
- UH-60M: 22,000

**CRUISE SPEED** (knots):
- UH-60A: 149
- UH-60L: 150
- UH-60M: 152

**RATE CLimb** (feet per minute):
- UH-60A: 814
- UH-60L: 1,315
- UH-60M: 1,646

**ENGINES** (2 each):
- GE-700
- GE-701C
- GE-701D

**EXTERNAL LOAD** (pounds):
- UH-60A: 8,000
- UH-60L: 9,000
- UH-60M: 9,000

**INTERNAL LOAD** (troops/pounds):
- UH-60A: 11/2, 640
- UH-60L: 11/2, 640
- UH-60M: 11/2, 640

**CREW**: two pilots, two crew chiefs

**ARMAMENT**: two 7.62mm machine guns

**FOREIGN MILITARY SALES**

**UH-60M**:
- Bahrain, Jordan, Mexico, United Arab Emirates, Taiwan, Thailand, Sweden

**UH-60L**:
- Brazil, Colombia, Egypt, Saudi Arabia, Thailand

**CONTRACTORS**

**UH-60M**:
- Sikorsky (Stratford, CT)
- 701D Engine: General Electric (Lynn, MA)
- Multi-Function Displays: Rockwell Collins (Cedar Rapids, IA)
- Flight Controls: Hamilton Sundstrand (Windsor Locks, CT)
