Office of Management and Budget (OMB): An Overview

Updated November 12, 2020
Office of Management and Budget (OMB): An Overview

The Office of Management and Budget (OMB) is a component of the Executive Office of the President (EOP). OMB is tasked with numerous statutory duties relating to the operations of executive branch agencies. As a source of support to the institutional presidency, OMB also acts on the President’s behalf in preparing the President’s annual budget proposal, overseeing executive branch agencies, and helping steer the President’s policy actions and agenda. In pursuing these activities, OMB interacts extensively with Congress and agencies in ways that are both publicly visible and more hidden from view. An overview of OMB may assist Congress in understanding OMB’s roles and operations and thereby may help to inform Congress’s evaluation of policy options.

OMB was originally established in 1921 as the Bureau of the Budget (BOB) within the Department of the Treasury. It functioned under the supervision of the President. In 1939, the office was transferred to the newly created EOP. BOB was redesignated in 1970 as OMB. Subsequently, Congress also statutorily established four offices within OMB (statutory offices) to oversee several cross-cutting processes and management matters.

Several institutional aspects of OMB may be of interest. OMB contains resource management offices that focus on particular agencies and policy domains, the statutory offices, and OMB-wide support offices, in addition to OMB’s leadership and their support staff. In recent years, Congress has provided funds to OMB through annual appropriations in the Financial Services and General Government (FSGG) annual appropriations bill. OMB’s budget includes funds in a “Salaries and Expenses” (S&E) account. It could be argued that OMB’s core budget also includes at least some funding in the “Information Technology Oversight and Reform” (ITOR) account.

OMB’s workforce may be viewed from at least two perspectives: OMB’s overall staffing composition and senior OMB positions that are established by statute. Furthermore, OMB’s website allows Congress and the public to explore OMB’s functions and policies, while also housing documents and other information, including characterizations of the agency’s mission.

OMB has significant and varied responsibilities. In pursuing these responsibilities, OMB is required to faithfully execute its statutory responsibilities as passed by Congress and, in addition, may act as an agent to pursue the President’s policy preferences. From Congress’s perspective, there may be tensions or contradictions between the two roles. Nevertheless, most observers identify the following as major functions of OMB:

- budget formulation and execution;
- legislative coordination and clearance;
- executive orders and proclamations;
- information and regulatory affairs; and
- mission-support areas and management initiatives.

Congress often faces trade-offs when considering issues that involve OMB. On one hand, Congress may statutorily authorize OMB with certain responsibilities in order to pursue Congress’s institutional and policy objectives. However, this authority may leave room for OMB to be more responsive to the presidency in ways that are inconsistent with congressional intent. As a result, Congress may confront multifaceted issues when considering options for legislating on OMB’s activities. Across the breadth of OMB’s responsibilities, potential issues for Congress include opportunities to conduct oversight of OMB’s activities and options for potential legislation that would modify OMB’s roles.

Introduction

The Office of Management and Budget (OMB) is a component of the Executive Office of the President (EOP). OMB has a number of statutory duties relating to the operations of executive branch agencies. As a source of support to the institutional presidency, OMB also acts on the President’s behalf in preparing the President’s annual budget proposal, overseeing executive branch agencies, and helping steer the President’s policy actions and agenda. In pursuing these activities, OMB interacts extensively with Congress and agencies in ways that are both publicly visible and more hidden from view.

Congress often faces trade-offs when considering issues that involve OMB. On one hand, Congress may choose to authorize OMB to undertake certain activities in order to help implement Congress’s institutional and policy objectives. However, granting such authorities may leave room for OMB to be more responsive to the presidency in ways that are inconsistent with congressional intent. As a result, Members and committees of Congress may confront multifaceted issues when considering options for legislating on OMB’s activities.

This report provides an overview of OMB, including selected institutional aspects and several of its major functions. These perspectives may assist Congress in understanding the roles and operations of OMB and thereby may help inform related congressional deliberations. The report concludes by highlighting potential issues for Congress regarding OMB, including opportunities to conduct oversight of OMB’s activities and options for potential legislation that would modify OMB’s roles.

In addition to the individuals listed on this report’s cover, multiple CRS analysts authored portions of the report. They are identified in footnotes to the sections they authored. A full list of CRS contributors is located in the “Key Policy Staff Table” at the conclusion of the report.

OMB History and Mission

Capsule Statutory History

The Office of Management and Budget traces its origin to 1921, when it was established as the Bureau of the Budget (BOB) within the Treasury Department by the Budget and Accounting Act, 1921. BOB functioned under the supervision of the President. Reorganization Plan No. 1 of 1939 transferred the bureau to the newly created Executive Office of the President (EOP).

1 Other components of the EOP include, for example, the National Security Council, the Council of Economic Advisers, and the Office of National Drug Control Policy. Some of these components are linked on the White House website, at U.S. White House, “The Administration,” at https://www.whitehouse.gov/the-trump-administration/. A full list may be found in the EOP’s annual budget justification available at U.S. White House, “Disclosures,” at https://www.whitehouse.gov/disclosures/.

2 P.L. 67-13, Budget and Accounting Act, 1921; June 10, 1921 (42 Stat. 20, at 22); currently codified in part at 31 U.S.C §501. This law and others cited in this report are summarized in CRS Report RL30795, General Management Laws: A Compendium, by Clinton T. Brass et al. (available upon request to congressional clients). The President appointed the BOB director and assistant director without Senate confirmation. The title of assistant director was changed to “deputy director” by P.L. 83-176, First Independent Offices Appropriation Act, 1954; July 31, 1953 (67 Stat. 298, at 299).

4 P.L. 76-19; April 3, 1939 (53 Stat. 1423); located at 5 U.S.C. Appendix. For related discussion, see section titled “Presidential Reorganization Authority (Inoperative)” in CRS Report R44909, Executive Branch Reorganization, by
Subsequently, Reorganization Plan No. 2 of 1970 re-designated BOB as the Office of Management and Budget.\(^5\) Concern about OMB’s accountability prompted Congress to make the director and deputy director subject to Senate confirmation in 1974.\(^6\) Congress also established four “statutory offices” within OMB to oversee several cross-cutting processes and management matters.

- The Office of Federal Procurement Policy Act established the Office of Federal Procurement Policy (OFPP) in 1974.\(^7\) OFPP provides guidance regarding the government-wide acquisition of goods and services necessary for executing the responsibilities of federal agencies.\(^8\)
- The Paperwork Reduction Act (PRA) of 1980 established the Office of Information and Regulatory Affairs (OIRA, pronounced “oh-eye-ruh”).\(^9\) The PRA was rewritten and recodified in 1995, including authorizing language for OIRA.\(^10\) In addition to its regulatory activities, OIRA oversees federal policy related to information policy, statistical policy, and privacy.\(^11\)
- The Chief Financial Officers (CFO) Act of 1990 established the Office of Federal Financial Management (OFFM).\(^12\) In addition to fulfilling several statutory responsibilities, OFFM carries out the President’s financial management improvement priorities and implements executive agencies’ financial management policies.\(^13\)
- The E-Government Act of 2002 established the Office of Electronic Government (E-Gov).\(^14\) Among other things, E-Gov “provide[s] overall leadership and direction” regarding Internet-based technologies to streamline the public’s interaction with the federal government.\(^15\)

\(^5\) Reorganization Plan No. 2 of 1970; July 1, 1970 (84 Stat. 2085); located at 5 U.S.C. Appendix.

\(^7\) P.L. 93-400; August 30, 1974 (88 Stat. 796); currently codified at 41 U.S.C. §1101. See also 31 U.S.C. §506.

Characterizations of OMB’s Mission

As a primary support agency for the institutional presidency, OMB has significant and varied responsibilities. A 1986 study identified 95 statutes, 58 executive orders, five regulations, and 51 circulars that reflected OMB’s operational authorities at the time. CRS is not aware of a more up-to-date, similarly detailed compendium of OMB’s statutory duties. However, some observers have written overviews of OMB’s organizational components and processes. In addition, observers may also look to how OMB itself characterizes its duties.

Succeeding Administrations have crafted mission statements for OMB that highlight each Administration’s perspective on OMB’s key responsibilities. Sometimes, the mission statement of OMB has substantially changed from one Administration to the next. OMB created its first website with a mission statement during the Clinton Administration, thus establishing a new venue for OMB to interact with Congress and the public. During the George W. Bush Administration, OMB featured the following portion of a mission statement on its website, which echoes some of the structure and substance of the Clinton Administration’s version:

OMB’s predominant mission is to assist the President in overseeing the preparation of the federal budget and to supervise its administration in Executive Branch agencies. In helping to formulate the President’s spending plans, OMB evaluates the effectiveness of agency programs, policies, and procedures, assesses competing funding demands among agencies, and sets funding priorities. OMB ensures that agency reports, rules, testimony, and proposed legislation are consistent with the President’s Budget and with Administration policies.

During the Obama Administration, OMB featured the following portion of a mission statement on its website:

The core mission of OMB is to serve the President of the United States in implementing his vision across the Executive Branch. OMB is the largest component of the Executive Office of the President. It reports directly to the President and helps a wide range of executive departments and agencies across the Federal Government to implement the commitments and priorities of the President.

As the implementation and enforcement arm of Presidential policy government-wide, OMB carries out its mission through five critical processes that are essential to the President’s ability to plan and implement his priorities across the Executive Branch.

---

The Obama Administration’s website then elaborated on these “five critical processes,” including (1) budget development and execution, (2) management, (3) coordination and review of regulations, (4) legislative clearance and coordination, and (5) executive orders and presidential memoranda.

The Trump Administration’s version of the OMB mission included a similar discussion of these five critical processes:

OMB carries out its mission through five critical processes that are essential to the President’s ability to plan and implement his priorities across the Executive Branch: (1) Budget development and execution. (2) Management, including oversight of agency performance, human capital, Federal procurement, financial management, and information technology. (3) Regulatory policy, including coordination and review of all significant Federal regulations by executive agencies. (4) Legislative clearance and coordination. (5) Executive Orders and Presidential Memoranda.  

The Obama Administration’s characterization of OMB as the “implementation and enforcement arm of Presidential policy”—compared to the George W. Bush Administration’s emphasis on the technical functions of OMB—may help to illustrate an ongoing evolution in perspective regarding the potential roles of OMB. More recently, during the Trump Administration, OMB’s mission statement mirrored that of the Obama Administration, specifically with its discussion of the “critical processes.”

**Institutional Aspects of OMB**

Several institutional aspects of OMB may be of interest to Congress, including OMB’s organizational structure, budget, workforce, and website. The subsections below address these topics.

**Organizational Structure**

In addition to OMB’s leadership, which will be discussed in this report’s section titled “OMB Senior Officials and Appointments,” OMB has three major types of offices: (1) resource management offices (RMOs), (2) OMB-wide support offices, and (3) statutory offices. The OMB website currently does not include an organization chart. However, the most recent chart of OMB’s leadership and organizational structure—taken from the OMB website during the Obama Administration—is displayed in Figure 1.

RMOs are tasked with examining agency budget requests and developing funding recommendations for federal agencies under their purview. The bottom row of Figure 1 shows OMB’s RMOs. Each RMO focuses on a cluster of related agencies and issues to examine agency budget requests and make funding recommendations. To develop these recommendations, RMOs are tasked with integrating management, budget, and policy perspectives in their work. A politically appointed program associate director (PAD) leads each of the RMOs. Below the level of PADs and some of their immediate assistants, RMO staff are usually career civil servants and are organized into divisions and branches. Each RMO branch covers a cabinet department or collection of smaller agencies and is led by a career member of the Senior Executive Service

OMB’s program examiners staff each RMO branch. As shown from left to right in Figure 1, OMB’s RMOs as of January 2017 included (1) Natural Resource Programs; (2) Education, Income Maintenance and Labor Programs; (3) Health Programs; (4) General Government Programs; and (5) National Security Programs.

Above the RMOs, the left side of the organization chart in Figure 1 shows eight OMB-wide support offices. The offices address a variety of subject areas. For example, the Budget Review Division (BRD) coordinates the process for preparing the President’s annual budget proposal to Congress. The Legislative Reference Division (LRD) coordinates review of agencies’ draft bills, congressional testimony, and correspondence to ensure compliance with the President’s policy agenda. OMB’s Economic Policy Office works with the President’s Council of Economic Advisers and the Treasury Department to develop economic assumptions and more recently has focused on program evaluation. The other support offices included the General Counsel, Legislative Affairs, Strategic Planning and Communications, Performance and Personnel Management, and the Management and Operations Division.

OMB’s statutory offices oversee several cross-cutting processes and management matters. Analysts in the statutory offices develop policy, coordinate implementation, and work with the RMOs on agency-specific issues. The right side of the organization chart in Figure 1 shows the statutory offices. Three of the four statutory offices focus on mission-support functions of executive agencies: financial management (OFFM), procurement policy (OFPP), and information technology (E-Gov, shared with OIRA). The fourth office, OIRA, has a broad portfolio of responsibilities, including regulation, information policy, paperwork reduction, statistical policy, and privacy.
Figure 1. Archived Organization Chart for OMB (Obama Administration, January 2017)

OMB’s Budget

An overview of OMB’s budget may help illuminate how OMB allocates resources among its various activities. In addition, OMB’s budget may be viewed over time to paint a picture of any changes of the organization’s priorities. Historical information about OMB’s budget may be found in the Budget Appendix, an annually issued volume of presidential budget submissions, and congressional budget justifications for the EOP, which at times have been posted online at various locations.

OMB Budget and Selected History

In recent years, Congress has provided funds to OMB through annual appropriations in the Financial Services and General Government (FSGG) annual appropriations bill. OMB’s budget includes funds in a “Salaries and Expenses” (S&E) account. It could be argued that OMB’s core budget also includes at least some funding in a separate “Information Technology Oversight and Reform” (ITOR) account.

- The S&E account funds the core operations of OMB. The S&E account funds the RMOs, statutory offices, and OMB-wide support offices. For FY2019, the account’s actual obligations were $103 million, plus an additional $3 million for reimbursable activities.
- The ITOR account is controlled by the OMB director. The account provides funds “for the furtherance of integrated, efficient, secure, and effective uses of information technology in the Federal Government.” The director of OMB may transfer ITOR funds to “one or more other agencies to carry out projects to meet these purposes.” As described by OMB, the ITOR account has funded IT oversight and analysis by E-Gov, the U.S. Digital Service, and cybersecurity.

---

24 The most recent version of the President’s budget submission, including the Budget Appendix, may be found at OMB, “President’s Budget,” at https://www.whitehouse.gov/ombbudget/. For electronic versions of historical presidential budget submissions from the mid-1990s to the present, see U.S. Government Publishing Office, “Budget of the United States Government,” at https://www.govinfo.gov/app/collection/BUDGET/.

27 OMB obligated the $103 million against the annual appropriation it received in the FSGG act. The $3 million in reimbursable obligations corresponded to certain collections of funds from businesslike transactions by OMB. For discussion of reimbursements (and the broader category of offsetting collections), see U.S. Government Accountability Office (hereinafter GAO), A Glossary of Terms Used in the Federal Budget Process, GAO-05-734SP, p. 29.

29 Ibid. For some time, OMB funded some of E-Gov’s operations out of the ITOR account. For FY2021, OMB proposed to shift this funding from the ITOR appropriation to the S&E appropriation. See EOP, Fiscal Year 2021
predecessor to the ITOR account was first enacted as a part of FY2012 appropriations.\footnote{0} For FY2019, the account’s actual obligations were $24 million, plus an additional $5 million for reimbursable activities.\footnote{1}

Overall, the funds in OMB’s S&E account are dedicated mainly to personnel costs. Compensation and benefits were 81% of OMB’s $103 million in total, actual obligations for FY2019.\footnote{2} The remainder chiefly covered contractual services (10%). OMB’s S&E account has ranged in recent years from $93 million in obligations in FY2010 to $103 million in FY2019 (see Table A-1, in Appendix A).

The S&E account also may be broken down among OMB’s offices. Almost half (about 48%) of FY2019 funding went to the RMOs. About 35% went to the OMB-wide support offices (including E-Gov), and about 18% went to the other statutory offices.\footnote{3}

At times, OMB’s S&E budget has fluctuated due to reallocations of funding with other accounts in the EOP. In one instance, in the early 2000s, Congress shifted funds among budget accounts in the EOP related to an “enterprise services program.” For FY2003, Congress reallocated $8.3 million from OMB to the EOP’s Office of Administration (OA) for central procurement of goods and services,\footnote{4} reducing OMB’s appropriation compared to the prior fiscal year. The President subsequently requested for both FY2004 and FY2005 that similar funding be shifted back to OMB, but Congress continued a similar reallocation in both years.\footnote{5} For FY2006, the President requested that the reallocation to OA continue, but Congress shifted $7 million, for rent and health unit costs, from OA back to OMB, and appropriated $76.2 million (after rescission) to OMB.\footnote{6}

Separate from the S&E and ITOR accounts, OMB may also exercise control over the funding and operations of several councils of agency officials. These include the President’s Management

\footnotesize

\footnote{0}{Initially, appropriations bill language referred to this account as “Integrated, Efficient, and Effective Uses of Information Technology.” See Consolidated Appropriations Act, 2012 (P.L. 112-74, December 23, 2011; 125 Stat. 786, at 896), at https://www.govinfo.gov/content/pkg/PLAW-112publ74/pdf/PLAW-112publ74.pdf#page=112. It is conceivable that some of OMB’s activities that have been funded in the S&E account prior to FY2012 subsequently were funded by the ITOR account. If that is the case, it is not clear to CRS the extent to which that shift occurred.}

\footnote{1}{OMB, \textit{Budget of the U.S. Government, FY2021}, Appendix, p. 1147.}

\footnote{2}{OMB, \textit{Budget of the U.S. Government, FY2001}, Appendix, p. 1143. See also EOP, \textit{Fiscal Year 2021 Congressional Budget Submission} (Washington: EOP, 2020), p. OMB-9. Obligations are binding agreements that will result in immediate or future outlays.}

Council, the Chief Financial Officers Council, the Chief Information Officers Council, the Chief Human Capital Officers Council, the Chief Acquisition Officers Council, and the Performance Improvement Council. Specifically, the OMB director has generally received authority each year in the FSGG annual appropriations bill to approve transfers and reimbursements to finance the activities of the councils up to $17 million.\textsuperscript{37} In addition, the OMB director has received similar authority to approve how the transferred funds are administered by the head of the General Services Administration (GSA).\textsuperscript{38} The same provision provides further that up to $15 million may be transferred to address coordination, duplication, and activities related to Federal Government Priority Goals under the GPRA Modernization Act.\textsuperscript{39}

**Illustrative Topics from Consideration of OMB Appropriations**

A significant part of congressional oversight of OMB occurs during consideration of the annual FSGG appropriations bill, which includes the agency’s funding. Although topics that arise in the appropriations process for OMB’s budget may vary from year to year, the reports of the House and Senate Committees on Appropriations on the FSGG bill typically include directives for OMB which relate specifically to the agency and address government-wide management matters.\textsuperscript{40}

Over the last several years, for example, the appropriations committees have been interested in OMB’s personnel levels and have continued to direct OMB to provide quarterly reports on staffing, obligations, and hiring initiatives. Another issue of ongoing interest to the committees has been online access to federal agency budget documents, including justifications, which prompted a directive to OMB to issue guidance to the agencies on posting the justification documents in a searchable format on their public websites.\textsuperscript{41}

Another common topic of these committee directives has been OMB’s roles regarding general management and human capital management across the federal government. For example, the House Appropriations Committee report on the FY2021 FSGG bill directs OMB to ensure that federal agencies are in compliance with Title 31 of the \textit{U.S. Code}, including requirements for priority goals and outcomes and that agency budget requests directly link to performance plans. Appropriators also directed OMB to consult with the Office of Personnel Management (OPM) and GSA and then report back to the committee by September 30, 2021, on gaps in federal

\textsuperscript{38} Ibid. For detailed information about the activities of the councils, see EOP, \textit{Fiscal Year 2021 Congressional Budget Submission} (Washington: EOP, 2020), pp. CWC-1 – CWC-13.

\textsuperscript{39} P.L. 116-93, Consolidated Appropriations Act, 2020; Division C, Title VII, Section 721; December 20, 2019 (133 Stat. 2317, at 2488).

\textsuperscript{40} The committee reports may be found at CRS Appropriations Status Table, at https://www.crs.gov/ AppropriationsStatusTable/Index. The “Select Year” drop-down menu allows the user to navigate between different fiscal years from FY1999 to present.

information technology workforce skills, disciplines, and experience that are required to enable citizen-facing digital services.\textsuperscript{42}

**OMB’s Workforce**

Several perspectives on OMB’s workforce may help illustrate how OMB’s personnel are distributed across the agency and funded by OMB’s appropriations. This report focuses on the OMB workforce in two primary ways: a discussion of OMB’s overall staffing composition and a more focused look at senior OMB positions that are established by statute.

**OMB Staffing Composition and Recent History**

It is possible to quantify OMB’s staffing in two ways: full-time equivalent (FTE) positions and on-board employment. Each involves a different way of counting employees.

- FTEs calculate employee work years. One full-time employee working 40 hours per week for 52 weeks would constitute one FTE; two part-time employees each working 20 hours per week for 52 weeks also would constitute one FTE.\textsuperscript{43}
- On-board employment shows an employee headcount at a snapshot in time. On-board employment is the number of employees in pay status regardless of full-time or part-time status.\textsuperscript{44}

With respect to OMB’s S&E appropriation, OMB had an actual count of 466 FTEs in FY2019.\textsuperscript{45} The ITOR account had 84 FTEs, plus an additional 21 FTEs for reimbursable activities for FY2019.\textsuperscript{46}

In practice, the ITOR account has paid for staff and activities of both the U.S. Digital Service (USDS) and OMB’s E-Gov.\textsuperscript{47} CRS is not aware of a breakdown of staffing funded by the ITOR account that contrasts OMB core operations with activities of USDS. Consequently, for purposes of oversight of OMB, it may be difficult for observers to determine how much of the funding for OMB’s staff comes from the ITOR account. Nevertheless, it appears the ITOR account has been used to fund core activities of OMB that otherwise might have been funded by the S&E account. Notably, in the FY2021 Congressional Budget Justification for EOP, the President requested a shifting of funds and 21 FTEs from the ITOR appropriation into the OMB appropriation for operations of E-Gov.\textsuperscript{48}

Not counting staffing associated with the ITOR account, OMB’s staffing associated with the S&E account has fluctuated over time, with a somewhat steady decline in recent years. In the OMB budget justification for FY2021, the justification characterized OMB’s FTE levels as having “dropped by more than 50 FTE—a reduction of approximately 10 percent—since FY2010.”\textsuperscript{49} However, because it is unclear how many OMB staff were funded by the ITOR account, it is also unclear whether the decline in staffing reflected a shift of funding from the S&E account to the

\textsuperscript{42} H.Rept. 116-456 (116th Cong.), pp. 37-38.
\textsuperscript{43} For further discussion, see Appendix A, Table A-1, and accompanying text.
\textsuperscript{44} For further discussion, see Appendix A, Table A-3, and accompanying text.
\textsuperscript{46} OMB, Budget of the U.S. Government, FY2021, Appendix, p. 1142, at https://www.whitehouse.gov/omb/appendix/.
\textsuperscript{47} See related discussion in this report’s section titled “OMB Budget and Selected History.”
\textsuperscript{48} EOP, Fiscal Year 2021 Congressional Budget Submission (Washington: EOP, 2020), pp. OMB-3 and ITOR-10.
Office of Management and Budget (OMB): An Overview

ITOR account as opposed to a reduction in OMB’s core operations. In FY2010, actual FTE for the S&E account was 527.\textsuperscript{50} In FY2014, actual FTE employment diminished to 435.\textsuperscript{51} The FTE estimate for FY2020 was 477.\textsuperscript{52}

In addition to OMB’s overall FTE figures, the data can be broken down by OMB’s organizational units.\textsuperscript{53} OMB’s RMOs account for the largest subset of OMB’s FTEs (219 out of 466 FTEs in FY2019, or nearly 47%). With respect to three of OMB’s statutory offices, OFFM had 17 FTEs, OIRA had 49, and OFPP had 15 in FY2019 (81 out of 466 FTEs in FY2019, or about 17%).\textsuperscript{54} OMB includes E-Gov in its accounting of agency-wide support offices, which had 166 FTEs in FY2019 (166 out of 466 FTEs in FY2019, or nearly 36%).\textsuperscript{55}

Alternatively, OMB’s workforce can be thought about in terms of on-board employment. Since 2010, OMB’s on-board employment was at its highest level (630) in September 2016, at its lowest level (452) in September 2013, and at 584 in June 2019 (most current available).\textsuperscript{56} According to one scholar, 20 to 25 of OMB staff historically have been political appointees and the rest have been career civil servants,\textsuperscript{57} although these figures may be difficult to document precisely.

OMB Senior Officials and Appointments

Selected OMB Leadership Positions Established by Statute

Congress has created several key, appointed leadership positions in OMB via statute. As discussed in this report’s “Capsule Statutory History” section, the Budget and Accounting Act established the OMB director and deputy director positions. As the result of 1974 legislation, presidential appointments for these positions must be confirmed by the Senate. The Chief Financial Officers Act of 1990 established the deputy director for management (DDM) position, which is also subject to Senate confirmation. Congress also created leadership positions to oversee the four statutory offices.\textsuperscript{58}

Table 1 below, provides more detailed information about statutorily established OMB leadership positions. The first column (“Statutory Position Title”) displays the position title that was established by statute. The second column (“Original Enacting Law”) offers citations to the Statutes at Large where the laws that established the positions are located. The third column (“U.S. Code Location(s))” includes citations to the locations of the positions within the United States Code. The fourth column (“Type of Appointment”) labels each position as either (1) a presidential appointment with Senate confirmation (PAS) or (2) a presidential appointment (PA). Finally, the fifth column (“Statutory Pay Level’) notes the corresponding pay level within the

### OMB Appointments Issues

The OMB director, deputy director, and DDM positions are appointed by the President with Senate confirmation. Issues that arise relating to OMB’s senior political appointees may vary from time to time. During the Trump Administration, for example, two developments that have persisted for these positions include officials serving in (1) acting capacities for extended periods of time and (2) two roles simultaneously (also sometimes called dual-hatting).
With regard to the first issue, the director position was filled on an acting basis from mid-December 2018 (when OMB Director Mick Mulvaney was named acting White House chief of staff)\(^59\) until July 20, 2020 (when acting OMB Director Russell Vought was confirmed as director).\(^60\) Following reports of Margaret Weichert’s resignation from the DDM position in March 2020,\(^61\) the DDM position was filled on an acting basis by Michael Rigas.\(^62\)

As for the dual-hatting issue, Margaret Weichert also served as the acting director of OPM from early October 2018 until mid-September 2019,\(^63\) when Dale Cabaniss was confirmed as OPM director.\(^64\) As of October 2020, the acting DDM at OMB was Michael Rigas, who was the Senate-confirmed OPM deputy director and also the acting OPM director.\(^65\) As a case study from the Trump Administration, Table B-1 in Appendix B provides more detailed information related to the nomination and confirmation for each of these OMB positions.

OMB’s Website and Documents\(^66\)

In the mid-1990s, OMB established its own website providing content about several of its more significant activities as part of the www.whitehouse.gov domain. Currently, the website allows Congress and the public to explore OMB’s functions and policies while also acting as a digital

---

\(^59\) In mid-December 2018, the Senate-confirmed OMB director, Mick Mulvaney, was named acting White House chief of staff. National Public Radio reported that, “The White House clarified Friday night that Mulvaney will not resign from OMB. Spokeswoman Sarah Huckabee Sanders said in a statement that Mulvaney ‘will spend all of his time devoted to his role as the acting chief of staff for the President.’ OMB Deputy Director Russell Vought will ‘handle day to day operations and run OMB.’” See Jessica Taylor, “President Trump Names Mick Mulvaney as Acting White House Chief Of Staff,” National Public Radio, December 14, 2018, at https://www.npr.org/2018/12/14/676931195/president-trump-names-mick-mulvaney-as-acting-white-house-chief-of-staff.

\(^60\) The Senate confirmed Russell Vought as director of OMB on a vote (Record No. 131) of 51 to 45 on July 20, 2020.

\(^61\) President Donald Trump was inaugurated on January 20, 2017. OMB did not have a Senate-confirmed DDM until Margaret Weichert was confirmed on February 14, 2018, by voice vote. For discussion of Weichert’s resignation, see Eric Katz, “Trump’s Federal Personnel Point Person to Step Down,” Government Executive, February 14, 2020, at https://www.govexec.com/workforce/2020/02/trumps-federal-personnel-point-person-step-down/163145/.

\(^62\) See Nicole Ogrysko, “OPM’s Rigas to Take on Second Position as OMB Acting Deputy,” Federal News Network, March 25, 2020, at https://federalnewswork.com/people/2020/03/opms-rigas-to-take-on-second-position-as-omb-acting-deputy/, which observed that “With his new acting appointment, Rigas will be the second person in three years to serve as the federal government’s personnel leader for two separate agencies.”

\(^64\) The Senate confirmed Dale Cabaniss as OPM director on a vote (Record No. 271) of 54 to 38 on September 11, 2019.

\(^65\) Adam Mazmanian, “Rigas to Take on DDM Role,” Federal Computer Week, March 25, 2020, at https://fcw.com/articles/2020/03/25/ragas-omb-ddm-dualhat.aspx. See also discussion in Nicole Ogrysko, “OPM’s Rigas to Take on Second Position as OMB Acting Deputy,” Federal News Network, March 25, 2020, at https://federalnewswork.com/people/2020/03/opms-rigas-to-take-on-second-position-as-omb-acting-deputy/, which observed that “With his new acting appointment, Rigas will be the second person in three years to serve as the federal government’s personnel leader for two separate agencies.”

\(^66\) This section was written by Taylor N. Riccard, Analyst in Government Organization and Management and Meghan M. Stuessy, Analyst in Government Organization and Management.
platform for OMB to publish documents. Under the Trump Administration, OMB’s website offers information on a variety of topics, including the following:

- **President’s Budget**, which contains various volumes of the President’s Budget.
- **Information and Guidance**, which contains guidance and written communications published by OMB.
- **Information and Regulatory Affairs**, which contains resources regarding OIRA.
- **U.S. Intellectual Property Enforcement Coordinator**, which contains documents relating to intellectual property policy and strategy.
- **Legislative**, which contains documents related to the President’s legislative activities.
- **Management**, which contains information about the statutory offices and management-related initiatives.

The homepage also displays OMB’s mission statement and information regarding OMB’s leadership. In addition, it features contact information and recent OMB statements and releases.

The website has evolved over time and from Administration to Administration. The National Archives and Records Administration (NARA) has responsibilities under the Federal Records Act and the Presidential Records Act to ensure proper retention and access to records materials, including materials on the www.whitehouse.gov domain. Whereas records created by OMB generally are considered to be federal records subject to retention requirements established by the Federal Records Act, other components of the EOP create presidential records that may have permanent preservation value pursuant to the Presidential Records Act. As a result, federal records created by OMB may be subject to less stringent requirements than presidential records created by other components of the EOP. In practice, however, NARA treats all records on the White House website (including those created by OMB) as suitable presidential records content for preservation.

As part of its preservation efforts, NARA creates “frozen in time” website approximations of the www.whitehouse.gov domain and associated sites at the conclusion of a presidency but not at various points during an Administration. NARA notes, “These websites are no longer updated so links to external websites and some internal pages will not work.” Policy decisions such as when and what to collect may impact the material’s context (i.e., the circumstances that situate

74 Ibid.
major functions. Some accompanying digital information, such as who accessed the information or reviewed the document, may not be available without holistic preservation. Such decisions may have implications on the type of information available to future researchers, federal agencies, and Congress.\textsuperscript{75}

## Major Functions

As noted earlier in this report, OMB has significant and varied responsibilities.\textsuperscript{76} In pursuing these activities, OMB is required to faithfully execute its statutory responsibilities as passed by Congress and, in addition, may act as an agent to pursue the President's policy preferences. From Congress's perspective, there may be tensions or contradictions between the two roles. When viewed through either of these lenses, most observers identify the following as major functions of OMB.

### Budget Formulation and Execution

The U.S. Constitution vests Congress with the “power of the purse” but is largely silent regarding the President’s role in the budget process.\textsuperscript{77} Accordingly, the current executive budget process is largely an outgrowth of statutes enacted by Congress.\textsuperscript{78} OMB plays a significant role in the executive budget process, and it engages in several budget-related activities to implement the statutes and to support the institutional presidency.

Under statutory provisions originally associated with the Budget and Accounting Act, 1921,\textsuperscript{79} the President is required annually to submit a consolidated budget proposal for Congress’s consideration. OMB frequently acts on the President’s behalf in this process. To guide agencies in formulating proposals, OMB sends budget instructions to agencies via its Circular No. A-II.\textsuperscript{80} OMB updates this multi-hundred page document each year to reflect new developments and the President’s budget and management priorities. Agency heads then forward their formal budget requests to OMB for review, where the RMOs in cooperation with other OMB offices (e.g., E-Gov for information technology initiatives) assemble options and analysis for decisions by OMB and the White House. After an opportunity for agency appeals, the Budget Review Division coordinates production of the President’s budget.\textsuperscript{81}

\textsuperscript{75} Other government agencies, educational institutions, and private organizations have worked to fill such gaps both at the conclusion of a presidency and throughout a presidency by allowing users to capture the page or subpage as it appeared on a particular day. Whereas NARA is tasked with collecting and retaining materials that are federal records, these additional institutions may collect broader information that, while not record information, may provide valuable context to presidential documents. See End of Term Web Archive: U.S. Federal Web Domain at Presidential Transitions, Project Partners, at http://eotarchive.cdlib.org/partners.html; and Internet Archive, Join us for a White House Social Media and Gov Data Hackathon!, January 2, 2017, at https://blog.archive.org/2017/01/02/join-us-for-a-white-house-social-media-and-gov-data-hackathon/.

\textsuperscript{79} 31 U.S.C. §1105.

\textsuperscript{80} OMB, “Circulars,” at https://www.whitehouse.gov/omb/information-for-agencies/circulars/.

\textsuperscript{81} The most recent presidential budget submission is available at OMB, “President’s Budget,” at
When Congress passes appropriations bills and they are signed into law, “budget execution” begins. A group of statutory provisions that observers refer to collectively as the Antideficiency Act requires OMB to “apportion” appropriated funds—that is, make appropriations available to agencies in legally binding increments (e.g., quarterly). The statute’s express purpose is to prevent federal officials from obligating or expending funds at a rate that would prematurely exhaust the funds, such as before the end of a fiscal year. In practice, OMB may include within an apportionment certain “footnotes” that OMB states are legally binding for apportioned amounts. OMB has indicated that a footnote may be used to make funds available for obligation only “when specified events occur (such as an agency taking certain action).” In this way, OMB may attempt to influence an agency’s implementation of appropriations and authorizing acts. At times, observers have expressed concerns about OMB’s use of footnotes.

OMB also provides budget-related guidance on additional topics, including but not limited to continuing resolutions, government shutdowns, agencies’ use of discretion in allocating funds to specific locations and recipients, and agencies’ use of discretion with mandatory spending programs.

### Legislative Coordination and Clearance

OMB plays a key role in coordinating the President’s legislative activities. Under *Circular No. A-19*, the Legislative Reference Division (LRD) coordinates executive branch review and clearance of congressional testimony, congressional correspondence, and agencies’ draft bills to help ensure compliance with the President’s policy agenda. In these ways, LRD may make known the Administration’s views on legislation and may allow affected agencies, either directly or via RMOs, to provide input during intra-executive branch policy development. Through the legislative coordination and clearance process, LRD works with the RMOs and political

90 This section was written by Meghan M. Stuessy, Analyst in Government Organization and Management.

leadership of OMB to decide which agency views shall be accepted and which shall be discarded in forming the Administration’s view on the matter at hand. These deliberations typically are not visible to Congress.

For non-appropriations legislation, LRD coordinates the preparation of “Statements of Administration Policy” (SAPs, pronounced “saps”) on some pending legislation. As part of OMB’s coordination process concerning legislative matters, LRD also authors memoranda to advise the President on enrolled bills (e.g., recommending signature or veto, or contents for signing statements) when legislation is presented to the President. BRD performs similar duties for appropriations legislation. SAPs serve to inform the executive branch, Congress, and the public of the Administration’s stance early in the legislative process. While SAPs provide Presidents an opportunity to assert varying levels of support for or opposition to a bill, a SAP also may signal whether the Administration intends to veto the bill. Members of Congress may pay particular attention to a SAP when a veto threat is being made. At least one congressional leader characterized SAPs as forerunner indicators of a veto.

Executive Orders and Proclamations

OMB considers its role in the development, review, and promulgation of executive orders and proclamations to be one of its “five critical processes” (see this report’s section titled “Characterizations of OMB’s Mission”). Under Executive Order (E.O.) 11030, the OMB director receives, reviews, and approves or disapproves executive orders and proclamations proposed by agencies. The OMB director also prepares commemorative proclamations and plays a role in the implementation of some executive orders. For example, some executive orders direct OMB to monitor the implementation of an order. To fulfill this duty, OMB may issue guidance memoranda to the heads of departments and agencies. Finally, OMB typically

92 For more information on SAPs, see CRS Report R44539, Statements of Administration Policy, by Meghan M. Stuessy. For a visual representation of the process of presenting legislation to the President, see CRS Infographic IG10007, Presentation of Legislation and the Veto Process, by Meghan M. Stuessy.

97 Executive Order 11030, “Preparation, Presentation, Filing, and Publication of Executive Orders and Proclamations,” 27 Federal Register 5847, June 19, 1962. The current iteration of the older version of the order, which has been amended by several subsequent orders, can be found at 1 C.F.R. §19.

98 1 C.F.R. §19.2. Executive orders approved by the OMB director are also submitted to the Attorney General and the director of the Office the Federal Register for review prior to submission to the President.

99 1 C.F.R. §19.4.

100 For a recent example, see Executive Order 13924, “Regulatory Relief to Support Economic Recovery,” 85 Federal Register 31353, May 19, 2020. Section 8 of the executive order requires the director of OMB to “monitor compliance with this order” and authorizes the director to “issue memoranda providing guidance on implementing this order, including by setting deadlines for the [required] reviews and reports.”

Office of Management and Budget (OMB): An Overview

issues a Budgetary Impact Statement after the release of an executive order that provides the Administration’s analysis of the projected budgetary impact of the executive order.102103

Information and Regulatory Affairs104

As noted earlier, OMB’s Office of Information and Regulatory Affairs (OIRA) was created by the Paperwork Reduction Act (PRA), which President Jimmy Carter signed into law in 1980.105 The PRA provided that the OIRA administrator would serve as the “principal advisor to the [OMB] Director on Federal information policy.”106 The OIRA administrator is appointed by the President and subject to Senate confirmation.107 Specific areas of responsibility assigned to the OMB director under the PRA have been delegated to OIRA, including information resources management, review and approval of federal information collection and reduction of paperwork burden, agency dissemination of and public access to information, statistical policy and coordination, records management, privacy, and the acquisition and use of information technology.108 In addition to the specific statutory responsibilities listed in the PRA, OIRA has substantial responsibilities and influence over federal agencies’ regulations under a centralized review process established through executive order.

OIRA Review of Regulations109

OIRA’s most significant function may be its centralized review of federal regulations. Through this review, OIRA exerts considerable influence over the content of regulations, ensuring that federal agencies’ actions are consistent with the President’s policy preferences.110

The current process for OIRA review of regulations was established in 1993 by President Clinton in E.O. 12866, which was largely based upon a process established by President Ronald Reagan in 1981.111 Under E.O. 12866, which remains in effect, covered agencies submit their

102 This is also sometimes referred to as a Budgetary Impact Analysis.
104 This introductory section was written by Maeve P. Carey, Specialist in Government Organization and Management.
106 44 U.S.C. §3504(a)(1). The PRA was reauthorized in 1986 (P.L. 99–500; 100 Stat. 1783–335) and 1995 (P.L. 104–13; 109 Stat. 163), and the list of OIRA’s duties changed somewhat. For example, the 1995 amendments increased the specificity of the management-related provisions and changed “information policy” to “information resources management policy” (44 U.S.C. §3503(b)).
107 The OIRA administrator was originally appointed by the director of OMB, but in the 1986 reauthorization, Congress amended the appointment provision to require Senate confirmation for the administrator (P.L. 99–500; 100 Stat. 1783–336).
109 This section was written by Maeve P. Carey, Specialist in Government Organization and Management.
110 Information about regulations that have previously been, and are currently, under review at OIRA can be found on OIRA’s website at https://www.reginfo.gov/public/do/eoPackageMain.
111 Executive Order 12866, “Regulatory Planning and Review,” 58 Federal Register 51735, October 4, 1993. E.O. 12866 replaced E.O. 12291 (Executive Order 12291, “Federal Regulation,” 46 Federal Register 13193, February 19, 1981), which was issued by President Reagan soon after OIRA was created. Although E.O. 12866 replaced President Reagan’s order, it left much of the centralized review process intact.
“significant” proposed and final rules to OIRA for review prior to publication. OIRA reviews the content of each rule to ensure that it is consistent with the President’s policy preferences. In addition, agencies must determine whether each rule is “economically significant” and, if it is, conduct a cost-benefit analysis of the rule, ensuring the benefits justify the costs of the rule. OIRA reviews these cost-benefit analyses to ensure they comply with OMB Circular A-4, which OMB issued in 2003 to instruct agencies on how to conduct cost-benefit analysis. Finally, OIRA also coordinates an interagency review process, which may include sending a rule to other parts of OMB, the EOP, or other federal agencies.

Although E.O. 12866 has remained in effect since 1993, and the process for OIRA review of regulations has remained largely consistent across Administrations, subsequent Presidents have sometimes added further requirements to the process established in the order. For example, President Trump issued E.O. 13771 in January 2017, creating a “one-in, two-out” requirement whereby agencies are told they must offset the costs of new rules by eliminating equivalent costs associated with at least two previously issued rules. When OIRA reviews rules under E.O. 12866, it also checks whether agencies have followed this “one in, two out” policy.

OIRA Review of Information Collections

Although OIRA may attempt to wield significant power under the centralized regulatory review process described above, the primary function of OIRA, as established in the initial version of the PRA, was to oversee and enforce government-wide efforts to reduce the paperwork burden on the American public. To achieve that goal, the PRA tasked OMB and OIRA with reviewing and approving federal agencies’ collections of information—e.g., government surveys, tax forms, and

---

112 “Significant” rules are those defined in section 3(f) of E.O. 12866 as the following: “Any regulatory action that is likely to result in a rule that may (1) have an annual effect on the economy of $100 million or more or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities; (2) create a serious inconsistency or otherwise interfere with an action taken or planned by another agency; (3) materially alter the budgetary impact of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients thereof; or (4) raise novel legal or policy issues arising out of legal mandates, the President’s priorities, or the principles set forth in the Executive order.” Rules falling into category (1) above are considered “economically significant.” OIRA review and E.O. 12866’s requirement for cost-benefit analysis do not currently apply to the statutorily designated “independent regulatory agencies,” which are listed at 44 U.S.C. §3502(5)). For more information, see CRS Report R42821, Independent Regulatory Agencies, Cost-Benefit Analysis, and Presidential Review of Regulations, by Maeve P. Carey and Michelle D. Christensen.

113 In conducting these cost-benefit analyses, agencies follow guidance issued by OMB in 2003 (OMB, Circular A-4, Regulatory Analysis, September 17, 2003). OMB has also issued a number of guidance documents on other aspects of the federal rulemaking process. These documents are available on OMB’s website at https://www.whitehouse.gov/omb/information-regulatory-affairs/regulatory-matters/.

114 OMB, Circular A-4, Regulatory Analysis, September 17, 2003. OMB also has issued a number of guidance documents on other aspects of the federal rulemaking process. These documents are available on OMB’s website at https://www.whitehouse.gov/omb/information-regulatory-affairs/regulatory-matters/.

117 This section was written by Maeve P. Carey, Specialist in Government Organization and Management.

118 Paperwork burden refers to the time, effort, and financial resources expended to respond to federal information collections, regardless of whether the collection is mandatory (such as a tax form) or voluntary (such as an application for benefits).
regulatory reporting requirements. The PRA applies to almost every executive agency and most federal information collections.\textsuperscript{119}

The PRA requires agencies to provide a 60-day public comment period and then submit an information collection request (ICR) for review and approval by OIRA.\textsuperscript{120} OIRA is then required to hold an additional 30-day public comment period prior to its review of the ICR.\textsuperscript{121} In its review, OIRA is required to consider a number of factors, such as whether the collection is necessary, minimizes the burden imposed by the collection, and maximizes the practical utility or public benefit from the information collected.\textsuperscript{122} Once OIRA grants its approval, a control number is assigned to the collection and the agency may proceed with collecting the information.\textsuperscript{123} OIRA may grant approval for up to three years, after which the agency must undertake another approval process to renew the collection.\textsuperscript{124}

\section*{Statistical Policy\textsuperscript{125}}

The PRA also requires OMB to coordinate the largely decentralized federal statistical system.\textsuperscript{126} It consists of 13 “principal statistical agencies” and three “recognized statistical units” whose “principal mission is to produce official Federal statistics.”\textsuperscript{127} According to OMB, there are also more than “100 other Federal programs in statistical activities spanning measurement, information collection, statistical products, data management, and dissemination.”\textsuperscript{128} Under 44 U.S.C. §3504(e)(7), a chief statistician carries out related coordination activities. This official, who heads the Office of Statistical and Science Policy in OIRA, is responsible for ensuring that budget proposals conform to “system-wide priorities; establishing standards and guidance for data collection and dissemination; assessing agency compliance with those standards;

\begin{footnotesize}
\textsuperscript{119} 44 U.S.C. §3502.
\textsuperscript{120} 44 U.S.C. §§3506 and 3507.
\textsuperscript{121} 44 U.S.C. §3507(b).
\textsuperscript{122} 44 U.S.C. §3504.
\textsuperscript{123} Failure to obtain OIRA approval for an active collection represents a violation of the PRA and triggers the PRA’s public protection provision (44 U.S.C. §3512). Under the PRA’s public protection provision, an individual or entity may not be penalized for failing to comply with a collection of information subject to the act if the collection does not display a valid OMB control number.
\textsuperscript{125} This section was written by Jennifer D. Williams, Specialist in American National Government.
\textsuperscript{126} 44 U.S.C. §3504(e).
\end{footnotesize}
coordinating interagency and international statistical activities; and reviewing Federal statistical programs.’” Other statutory provisions grant significant authority to the OMB director to influence interagency data sharing and potential warehousing for “statistical purposes.”

Information Policy

OIRA has issued guidance that leverages its authorities under 44 U.S.C. §3504 to provide direction and oversight of the federal government’s records management activities, sharing of information, and use of electronic information technology. OMB’s Circular A-130 requires agencies to monitor and manage their information for privacy, confidentiality, and security risks, but also for opportunities to increase interoperability, openness, and transparency throughout the information’s life cycle. The circular defines the information life cycle as the stages of creation or collection, processing, dissemination, use, storage, and disposition, to include destruction and deletion of the information.

Building on these authorities, in 2013, President Barack Obama issued E.O. 13642, which required OMB to create an Open Data Policy to advance the management of government information as an asset. Following the executive order, OMB issued Memorandum M-13-13 to encourage agencies to manage datasets contained in information systems in a way that improves the discoverability and usability of those datasets while weighing the value of openness against the cost of making those data public. Across the executive branch, M-13-13 tasks the Federal Chief Information Officer (i.e., Administrator of E-Gov), the U.S. Chief Technology Officer, and administrator of OIRA to improve the interoperability and openness of government information. Portions of these administrative directives were enacted into law in 2019, in the Open, Public, Electronic, and Necessary (OPEN) Government Data Act.

Mission-Support Areas and Management Initiatives

OMB has responsibility for overseeing multiple aspects of the management of agencies in the executive branch. Among other things, OMB’s DDM is charged with overall responsibility for general management policies in the executive branch, including issues within the purview of OMB’s statutory offices, plus human resources management. The statutory offices also develop

---

129 Ibid. For the underlying statutory provisions, see 44 U.S.C. §3504(e).
131 This section was written by Meghan M. Stuessy, Analyst in Government Organization and Management.
135 Ibid.
policy and coordinate implementation in the mission-support areas of procurement policy (OFPP), financial management (OFFM), and information policy and technology (OIRA and E-Gov, respectively). The statutory offices work with OMB’s RMOs, which are tasked with integrating budget, policy, and management issues for specific agencies in cooperation with the statutory offices.

**Office of Federal Procurement Policy (OFPP)**

Headed by the administrator for federal procurement policy, OFPP is responsible for (1) providing “overall direction of Government-wide procurement policies, regulations, procedures, and forms” for executive branch agencies and (2) promoting “economy, efficiency, and effectiveness” in executive branch procurements. Among numerous other functions, OFPP provides leadership in maintaining the Federal Acquisition Regulation (FAR), the executive branch-wide procurement regulation, and provides for and directs the Federal Procurement Data System-Next Generation (FPDS-NG or FPDS), which is maintained by GSA. OFPP is also responsible for directing the Federal Acquisition Institute (FAI) and developing policies for small-business contracting. FAI is responsible for developing “a high-performing, qualified civilian acquisition workforce.” In consultation with the head of the Small Business Administration (SBA), OFPP develops policies designed to help ensure that small businesses, generally, and certain types of small businesses (e.g., women-owned small businesses) “are provided with the maximum practicable opportunities to participate in procurements” that are below the simplified acquisition threshold.

**Office of Federal Financial Management (OFFM)**

The Chief Financial Officers Act of 1990 (CFO Act) established OFFM within OMB to centralize the development and implementation of financial management policies among executive branch agencies. OFFM is headed by a controller, a political appointee who reports directly to the DDM. The CFO Act also established the CFO Council—a consultative body led by the OFFM controller on behalf of the DDM—which provides the perspectives of agencies to OMB and assists OFFM with the drafting of some financial management policies. OFFM promulgates final policies via OMB circulars.

---

137 This section was written by L. Elaine Halchin, Specialist in American National Government.
139 The FAR consists of Parts 1-53 of Title 48 of the Code of Federal Regulations (CFR).
140 FPDS is a federal government database. Executive branch agencies are required to submit data regarding unclassified contract actions whose value is greater than a certain dollar amount to FPDS (48 CFR §4.606(a)).
142 41 U.S.C. §1122(a)(1), (4), (5), and (11).
143 This section was written by Dominick Fiorentino, Analyst in Government Organization and Management.
Additionally, agencies must submit their annual audit reports—typically included in Performance and Accountability Reports or Agency Financial Reports—to OFFM.\(^{148}\) OFFM reviews these reports to verify they contain the required information under Circular A-136 and compiles the material weaknesses described in the audit reports. A provision originally enacted in the CFO Act also requires OMB to annually submit to Congress a revised government-wide five-year plan describing how the OMB director, the DDM, the OFFM controller, and agency CFOs will improve federal financial management.\(^{149}\) Since 2009, OMB has ceased publishing a unified document covering the statutory requirements, and it is unclear to CRS where the required components may be found.\(^{150}\)

**Office of Electronic Government (E-Gov)**\(^{151}\)

The E-Government Act of 2002 (E-Gov Act) established the Office of Electronic Government.\(^{152}\) OMB refers to it as the Office of E-Government and Information Technology, or E-Gov.\(^{153}\) The administrator of E-Gov is presidentially appointed and is responsible for, among other things, providing overall leadership for the executive branch on electronic government and setting IT standards and guidelines for executive branch agencies.\(^{154}\) By law, the E-Gov administrator leads the activities of the Chief Information Officers (CIO) Council—also established by the E-Gov Act—on behalf of OMB’s DDM.\(^{155}\) The CIO Council has several statutory responsibilities, including dissemination of IT best practices among executive agencies. E-Gov must annually submit a report to Congress covering the implementation of E-Gov Act provisions.\(^{156}\)

Subsequent legislation, namely the Federal Information Security Modernization Act (FISMA) of 2014 and the Federal Information Technology Acquisition Reform Act (FITARA),\(^{157}\) imposed additional reporting requirements including, but not limited to, annual reviews of the technology

152 P.L. 107-347, December 17, 2002 (116 Stat. 2899, at 2902). Relevant provisions are codified at 44 U.S.C. 3602 (see https://www.congress.gov/107/plaws/publ347/PLAW-107publ347.pdf). Prior to this law’s enactment, OIRA had a branch that focused on both information policy and information technology issues. Sometime after the E-Government Act became law, the name of this OIRA branch dropped “information technology” from its name and became the Information Policy Branch.

portfolio of executive branch agencies, and reporting on the status of federal cybersecurity. OMB also uses ITOR funding to support several IT initiatives including, but not limited to, the IT policy-making and technology investment oversight activities of E-Gov. To implement these statutory requirements, E-Gov helps to develop OMB memoranda, circulars, and strategy documents guiding executive branch agencies on information security, IT standards, IT workforce planning, and IT capital planning, among other topics.

**OMB Roles in Federal Personnel Policy**

The DDM and the OMB director have various responsibilities that are associated with general government management and human resources management (HRM) in the federal government. With the OMB director’s direction and approval, the DDM is to establish general management policies for executive agencies and perform the director’s functions that are related to HRM. The DDM is also required to facilitate congressional and executive branch actions to improve federal government operations and administration and advise agencies on the qualifications, recruitment, performance, and retention of federal managers. The DDM is the chairperson of the President’s Management Council whose functions include “improving overall executive branch management.” A Cross-Agency Priority Goal under the Trump Administration’s “President’s Management Agenda” coordinates and tracks implementation on “Developing a Workforce for the 21st Century.” The DDM is also the vice chairperson of the Chief Human Capital Officers Council which advises and coordinates federal agency activities on modernizing human resources systems, improving the quality of human resources information, and suggesting legislation on human resources operations and organizations. In some contingency situations, OMB may address federal personnel issues. For example, in the wake of the Coronavirus Disease 2019 (COVID-19) pandemic, the OMB director, separately and jointly with the OPM director, issued memoranda providing guidance to executive agencies on conducting government operations. OMB also provides extensive guidance to agencies in the event of a government shutdown.

165 Information on this Cross-Agency Priority Goal is at https://www.performance.gov/CAP/workforce/.
In addition, OMB plays a significant role in federal employee pay. The OMB director, the Secretary of Labor, and the director of OPM comprise the President’s Pay Agent, which has a significant role in setting and adjusting General Schedule (GS) pay. The Pay Agent receives the annual report of the Federal Salary Council and submits an annual report to the President with recommendations on GS pay adjustment, locality pay areas, and the methodology underlying surveys on locality pay.169

Management Reform and Government Performance Efforts170

In recent decades, OMB also has led the development of the President’s agenda for executive branch management reform initiatives.171 Subject to the approval and direction of the OMB director, the DDM is statutorily charged with leading such efforts.172 During the George W. Bush Administration, OMB led the development and implementation of the President’s Management Agenda, a package of initiatives intended to address management of federal personnel, procurement, financial management, information technology, and linkage of budgeting and performance.173 Under President Obama, OMB developed and implemented a range of government-wide management efforts. Most often these initiatives were rolled out individually on an incremental basis,174 but sometimes they were presented under a common “President’s Management Agenda” framework.175 More recently, OMB released the Trump Administration’s version of the President’s Management Agenda, which articulated government-wide priorities for the management of information technology, data transparency, and federal workforce development.176 This was followed by a separate, but related, government reform and

170 This section was written by Henry B. Hogue, Specialist in American National Government, and Clinton T. Brass, Specialist in Government Organization and Management.
172 31 U.S.C. §503. The DDM is to carry out the OMB Director’s functions that pertain to “organizational studies, long-range planning...productivity improvement, and experimentation and demonstration programs.” They are further directed to “[f]acilitate actions by the Congress and the executive branch to improve the management of Federal Government operations and to remove impediments to effective administration [and to] [p]rovide leadership in management innovation.”
173 For a copy of the plan, see “President’s Management Agenda,” archived White House website from the presidency of George W. Bush, at https://georgewbush-whitehouse.archives.gov/omb/budintegration/pma_index.html.
175 See, for example, OMB, Management Agenda Priorities for the FY2016 Budget, M-14-12, July 18, 2014, at https://www.whitehouse.gov/omb/information-for-agencies/memoranda/#memoranda-2014. “The President’s Management Agenda seeks to improve the way that Government works and delivers for citizens. It is guided by four pillars: efficiency, effectiveness, economic growth, and people and culture. The Management Agenda is being executed through eight distinct Management Cross-Agency-Priority Goals that fall under these four pillars (p. 1).” The eight goals pertain to customer service, smarter information technology delivery, strategic sourcing, shared services, benchmarking, open data, transfer of new federally-funded technology to the private sector, and workforce development (p. 8).
reorganization plan that was intended to address executive branch agency mission alignment, service delivery, and effective use of public funds.\textsuperscript{177}

OMB also has focused on the performance of executive agencies in pursuing their statutory missions and exercising discretion under law. Many of these initiatives have potential implications for the generation, perceived usefulness, and use of information by a variety of stakeholders in support of learning and informed policy deliberations. Some efforts relate primarily to implementation of the Government Performance and Results Act of 1993 (GPRA), as modified by subsequent legislation (e.g., GPRA Modernization Act of 2010).\textsuperscript{178} These statutory provisions require agencies to, among other things, articulate mission statements, goals, and performance measures. Agencies are required to develop these items under their relevant authorizing statutes in consultation with Congress and nonfederal stakeholders, albeit in policy processes that historically have been driven by presidential priorities. Other efforts have related to analytical methods. For example, OMB had led implementation of administratively driven efforts to address government performance, such as the George W. Bush Administration’s Program Assessment Rating Tool and the Obama Administration’s varied initiatives.\textsuperscript{179} These efforts especially emphasized certain evaluation methods above others, which at times generated both support and controversy.\textsuperscript{180} More recently, with enactment of the Foundations for Evidence-Based Policymaking Act of 2018,\textsuperscript{181} OMB may be taking a broader view of analytical and evaluation methods as agencies develop “learning agendas.”\textsuperscript{182}

**Potential Issues for Congress**

This report surveys multiple perspectives on OMB: a capsule history, selected aspects of OMB as an institution, and OMB’s major functions. As noted, OMB is tasked with numerous statutorily and administratively established duties relating to the operations of executive branch agencies. These functions are varied and pervasive, ranging from the budget process to rulemaking to mission-support functions such as government procurement. In pursuing these activities, OMB is required to faithfully execute its statutory responsibilities as passed by Congress. In addition, OMB may act as an agent to pursue presidential policy preferences. From Congress’s perspective, there may be tensions or contradictions between the two roles.

\textsuperscript{179} For discussion, see, respectively, CRS Report RL32663, *The Bush Administration’s Program Assessment Rating Tool (PART)*, by Clinton T. Brass; and CRS Congressional Distribution Memorandum, *Obama Administration Agenda for Government Performance: Evolution and Related Issues for Congress*, January 19, 2011, by Clinton T. Brass (available to congressional clients upon request).

\textsuperscript{180} See ibid. and CRS Report RL33301, *Congress and Program Evaluation: An Overview of Randomized Controlled Trials (RCTs) and Related Issues*, by Clinton T. Brass, Erin D. Williams, and Blas Nuñez-Neto.

\textsuperscript{181} P.L. 115-435; January 14, 2019 (132 Stat. 5529).

OMB also may be viewed in the broader context of how the President attempts to use policy and institutional tools. Some observers have expressed concerns about potential “ politicization” of OMB. One scholar has characterized politicization as a term that has been used by critics to denote an increasing number of political appointees [at OMB] and the responsiveness of the agency to the personal political interests of the president rather than to institutional interests of the presidency. Yet OMB has not been the only presidential institution to undergo these developments; they are part of a broader historical trend over the past several decades to increase centralized control of the executive branch in the White House. OMB is only one part of that trend.

Other observers have focused on the nature of OMB’s behavior. OMB has been characterized as both “neutrally competent” and “responsively competent.” Neutral competence has been described as “operational expertise, nonpartisanship, and professionalism.” Responsive competence, in turn, refers to “centralizing the activities of policy development and executive branch coordination within the White House and by appointing presidential loyalists to positions deep within the bowels of executive agencies.”

Critics who perceive a trend toward responsive competence (i.e., potential political centralization) express concern this might adversely affect the quality of analysis and coordination from OMB. At the same time, others have argued that labeling OMB as neutrally competent or responsively competent presents a false dichotomy. Instead, from their point of view, it seems that both terms may at times be simultaneously applicable to OMB.

In light of these complicated dynamics, it is clear that Congress faces potential trade-offs when considering issues that involve OMB. Congress may choose to authorize OMB to undertake certain activities in order to leverage its expertise and position to help implement Congress’s institutional and policy objectives. However, granting such authorities may leave room for OMB to implement policies more in line with presidential agendas regardless of the intent of Congress. As a result, Congress may face difficult choices when considering how to legislate with respect to OMB’s activities. Congress also may face related challenges in conducting oversight of OMB in situations when OMB’s interactions with agencies are not publicly visible.

Nonetheless, OMB was created by Congress, and Congress has control over many aspects of the organization, scope, activities, and authority of OMB through the legislative process. Congress,

186 Ibid., pp. 142-143.

188 Ibid., p. 163.

189 For example, Congress might consider using OMB to coordinate among executive agencies in pursuit of agencies’ statutory missions or to address issues that cut across agency boundaries, while safeguarding against undesired OMB discretion.

for instance, may assign statutory duties to OMB in several ways, sometimes in response to administratively established practices that the President has delegated to OMB. Looking back, Congress has assigned statutory responsibilities to OMB for the governance of procurement, financial management, and paperwork reduction practices across the executive branch. Other legislation has addressed the manner in which OMB implements presidential delegations and administratively established processes, such as those relating to budget formulation, regulatory review, and executive-legislative relations. In some of these contexts, Congress may intend for OMB to promote interagency coordination.

Across this variety of contexts, potential issues for Congress may be grouped into two categories: (1) opportunities to conduct oversight of OMB’s activities and (2) options for potential legislation that would modify OMB’s role or authority over particular issues. With regard to oversight and legislation, Congress may consider several questions when formulating and evaluating any options, including the option of continuing with the status quo.

- **Oversight.** Which OMB activities are of interest to Congress? Are these activities transparent to Congress and the public? Is OMB pursuing these activities in line with congressional intent? Has OMB been effective at addressing problems? Who defines the problems to be solved? Are there areas in which OMB and other institutions might improve?

- **Legislation.** Are there opportunities for Congress to legislate on OMB’s roles and activities? Is OMB an appropriate institution for addressing a particular issue, or might Congress consider assigning responsibilities to other agencies? How might authority or responsibility provided to OMB by Congress alter power relationships between Congress and the President or between agencies and OMB? For example, might an increase in transparency of executive branch agency activities enable OMB to exercise undesired influence over statutory authorities that are vested in agency heads?\(^\text{191}\)

Given the breadth of areas in which OMB operates, considerations for Congress may vary substantially from context to context. In addition, the advantages and disadvantages of particular options, including continuation of the status quo, may be evaluated from multiple perspectives. Questions such as these may be relevant as Congress continues to fulfill its constitutional obligations and work with OMB, agencies, the President, and the public.

---

Appendix A. OMB Budget and Staffing History

Table A-1, below, shows the appropriations and full-time equivalent (FTE) employment for the Office of Management and Budget (OMB) from FY2010 (actual) to FY2020 (estimate). FTEs assign workforce estimates to agencies based on the number of work years required to achieve agency missions and objectives. One work year is equivalent to 2,080 hours of work and could represent, for example, one employee working 40 hours per week for 52 weeks, or two employees working 20 hours per week for 52 weeks. The work year estimate is based on the maximum cumulative number of hours that can be worked by all employees, including full-time, part-time and intermittent employees. Over the period, the data show that actual appropriations ranged from a low of $89.3 million in FY2014 to a high of $102.0 million in FY2019, and actual FTE levels ranged from a low of 435 in FY2014 to a high of 527 in FY2010.

</tr>
</tbody>
</table>

The appropriations for FY2011 are taken from Division B, Title V, Section 1516 of P.L. 112-10, Department of Defense and Full-Year Continuing Appropriations Act, 2011, 125 Stat. 133.

The appropriations for FY2013 are taken from Title I, Section 1101(2) of P.L. 113-6, Consolidated and Further Continuing Appropriations Act, 2013, 27 Stat. 412, which provides appropriations at the FY2012 level.

The appropriations for FY2018 are taken from Division E, Title II of P.L. 115-141, Consolidated Appropriations Act, 2018, 132 Stat. 548.

The appropriations for FY2019 are taken from Division D, Title II of P.L. 116-6, Consolidated Appropriations Act, 2019, 133 Stat. 151.
The FTE totals correspond to direct FTEs and not reimbursable FTEs. These figures are taken from OMB, Budget of the U.S. Government, Appendix, Fiscal Years 2012 through 2021 (Washington, GPO, February 2011 through February 2020), pp. 1113, 1213, 1123, 1187, 1145, 1163, 1053, 1059, 1063, and 1143 (for FY2019 and FY2020), respectively.

Notes: Typically, an agency’s prior year appropriations are shown in the Budget of the U.S. Government, Appendix. For those years in which appropriations are provided in consolidated or continuing appropriations, the enacted appropriations provide the funding amounts. This was the case for the FY2011, FY2013, FY2017, FY2018, and FY2019 appropriations.

The table does not include any supplemental appropriations amounts.

Table A-2, below, shows FTEs corresponding to OMB’s Salaries and Expenses (S&E) account. Specifically, the table displays FTEs broken down by OMB “program activity” from FY2016 actual to FY2021 proposed. These categories generally refer to OMB’s organizational units. The first five rows correspond to the resource management offices. The next three rows correspond to three of OMB’s statutory offices. The final row includes one of the statutory offices, the Office of Electronic Government, and the OMB-wide support offices (see table notes for a list). Over this period, the data show that the largest number of FTEs is allocated among the offices that provide services across the agency, including the director, the deputy director, and the deputy director for management (DDM). The smallest number of FTEs is allocated to the Office of Federal Financial Management and the Office of Federal Procurement Policy.
