Attachment 6

DECLASSIFICATION DETERMINATION (U)

I have determined, pursuant to section 142c of the Atomic Energy Act of 1954, that the following information can be published without undue risk to the common defense and security of the United States, and can, therefore, be declassified and removed from the category of Restricted Data:

Getter nickel plating thickness, permeation barrier, and associated fabrication parameters for the high-temperature light water reactor (LWR) Tritium-Producing Burnable Absorber Rod (TPBAR).
