Many, many thanks to Vince for expanding the NSA reps chart to include releasable CONUS reps. Simply finding references to these reps was hard enough. Following these guys around as they changed names with the frequent changes to the names of the units they supported is a dizzying task. You'll note that current, as well as historic, information is included for completeness and in an attempt to make this chart a one-stop-shop. Also thanks to Susan M. for starting the ball rolling with her initial question. This chart will replace the current one in LG-Locations.
